

## Frequently Asked Questions

1. How to measure for a correct quilt hanger width?

Hangers are quoted as "inside width". The overall outside width will be 1½"-2" more.

2. Should the actual width of the quilt exactly match the inside width of the hanger?
  - a. Not necessarily. The quilt can be right up to the inside width of the hanger. However, many customers order a wider hanger than most of their quilts – so quilts of various widths will fit the hanger and can be change out regularly. Some of our customers also use a wide hanger to hold multiple quilts.

3. Worried about losing the border of your quilt? Worry no more!

- a. The Easy Display Quilt Hanger works with or without a sleeve
- b. If you have a border view you don't want to cutoff, simply leave the bottom portion of sleeve unattached to the quilt, lift and hang quilt by drop down portion of the sleeve.

4. What are the standard widths?

12", 24", 36", 48", 60", and 72"

5. Are custom widths available?

Yes. We can make custom sizes in between any standard size and up to 120".

6. What types of wood is available?

- a. Standard Wood Choices: Maple (M), Oak (O), Mahogany (H), Cherry (C) and Walnut (W)
- b. Custom Wood: Please advise wood type preferred and we will let you know if it is available and submit a quote.

7. What is a "standard" finish?

- a. A matching color stain of the wood is applied to the standard solid wood choice. The primary purpose of the stain is to bring out the character of the wood more intense – without losing any of the original nature of the wood.
- b. A finish coat is then applied to help preserve the wood and enhance the character of the wood.

8. Can the hangers be bought unfinished?

- a. Yes – Choose the “standard” wood to be purchased. Note “unfinished” in the “Instructions from Buyer” section of the online shopping cart, or contact us at the information below.

Please contact us if have additional questions.
